

SIHI LEMD

Sizes 27, 52, 92, 127, 162, 252, 327, 427

Pressure range: 33 to 1013 mbar abs / up to 28.9 vac. inHg

Suction volume flow: 5 to 450 m³/h / 2.9 to 265 cfm

Design

Flowserve SIHI liquid ring vacuum pumps are displacement pumps of uncomplicated and robust construction with the following particular features:

- Handling of nearly all gases and vapours
- Optimized for handling of additional liquid carry-over
- Non-polluting due to nearly isothermal compression
- Oil-free, as no lubrication in the working chamber
- Easy maintenance and reliable operation
- Low noise and nearly free from vibration
- Protection against cavitation as standard
- Incorporated central drain
- Standard motors, future-proof and conform with NEMA Premium-Efficiency and IE3, IE4, etc.

The Flowserve SIHI liquid ring vacuum pumps LEMD are single-stage ones.

NOTE

During operation the pump must continuously be supplied with service liquid, normally water, in order to eliminate the heat resulting from the gas compression and to replenish the liquid ring, because part of the liquid is leaving the pump together with the gas. This liquid can be separated from the gas in a liquid separator.

It is possible to reuse the service liquid. The pumps are equipped with a device by which the contaminated service liquid can continuously be drained during operation (central drain), if necessary.

The direction of rotation is clockwise, when looking from the drive on the pump

APPLICATION

Handling and exhausting of dry and humid gases, entrained liquid can be handled during normal duty. The pumps are applied in all fields where a pressure of 33 to 900 mbar abs / 28.9 to 3.4 vac. inHg must be created by robust vacuum pumps.

GENERAL TECHNICAL DATA

Pump type	unit	LEM 27	LEM 52	LEM 92	LEM 127	LEM 162	LEM 252	LEM 327	LEM 427
Speed	50 Hz 60 Hz	2900				1450			
	rpm	3500				1750			
Maximum Overpressure	bar / psi	0.3 / 4.35							
Permissible pressure difference between suction and discharge side	max. min. bar / psi	1.1 / 15.95 0.2 / 2.9							
Hydraulic test pressure (overpressure)	bar / psi	3.0 / 43.51							
Moment of inertia of rotating parts of pump and water	kg · m² lb · ft²	0.003 0.07	0.005 0.12	0.007 0.17	0.009 0.21	0.070 1.66	0.097 2.30	0.140 3.32	0.210 4.98
Acoustic emission level at 80 mbar / 27 vac. in Hg suction pressure and 1 m / 3 feet distance	dB (A)	64	70	69	70	73	72	69	74
Maximum gas temperature	dry °C / °F saturated °C / °F	200 / 392 100 / 212							
Service liquid	°C / °F	60 / 140							
max. perm. Outlet temperature - Material 0F/VP	°C / °F	80 / 176							
max. perm. Outlet temperature - Material 0E/VA	°C / °F	10 / 50							
min. perm. Inlet temperature	mm²/s / ft²/s	4 / 4.3 · 10 ⁻⁵							
max. viscosity	kg/m³ / lb/US.liq.gal	1200 12							
max. density	Liter	0.5	0.6	1.0	1.1	2.9	3.9	5.9	7.2
Liquid capacity up to middle of shaft	US.liq.gal	.13	.16	.26	.29	.76	1.0	1.6	1.9
Maximum flow resistance of the heat exchanger	bar / psi	0.2 / 2.9							

The combination of several limiting values is not admissible.

Features

Robust and reliable

- Suction volume flow up to 450 m³/h / 265 cfm
- Suction pressure down to 33 mbar abs / 28.9 vac. inHg
- Cavitation and corrosion resistant impeller
- Handling of additional liquid carryover
- Integrated pre-condenser with high performance
- Enhanced life time

Based on standard motor design

- IMB 34 and 35 standard design
- Efficiency class to IEC IE3, IE4 and NEMA premium efficiency
- Different voltage ranges, frequencies and protection classes
- Various certificates, for example ATEX, CSA, UR, CC, etc.
- Further special requirements

Ready for ATEX

- Built-in measurement connections
- Level monitoring for start-up
- Temperature monitoring during operation
- No special piping, adaptors and fittings required
- Simple and economic monitoring for ATEX up to Zone 1

Compact and maintenance friendly

- Connections top IN / top OUT or inline
- Minimal space required
- Flexible inlet and outlet connections
- Motor bearings greased for lifetime
- Long-life mechanical seal
- Easy maintenance

Interchangeability with former LEM series

- Same performance
- No influence regarding system performance
- No process changes necessary

* LEMD 162 with threaded connections (vertically upwards) is only available in material design 0F and 0E.
LEM 162 with flanged connections is only available in material design VP and VA.

Performance Characteristics LEM 27, 52, 92, 127

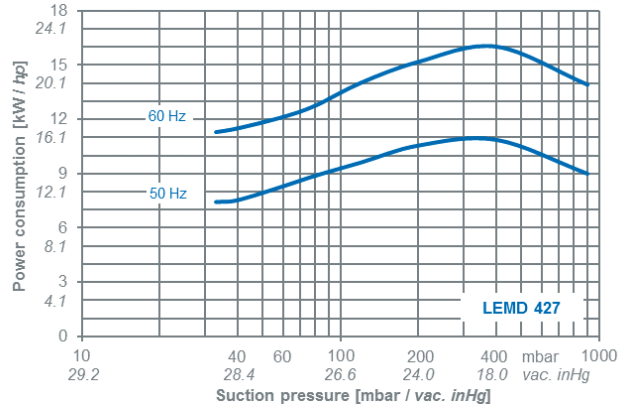

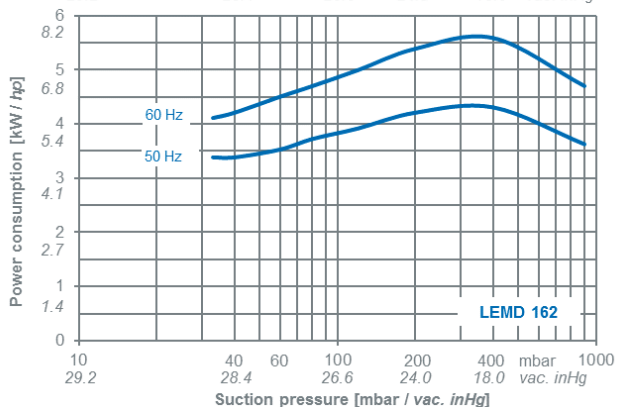

The operating data is valid under the following conditions:

- Process medium:
 - dry air: 20°C / 68°F
 - steam saturated air: 20°C / 68°F
- Service liquid:
 - water: 15°C / 59°F

Pressure of gas to be evacuated = 1013 mbar / 0 vac. inHg (atmosph. pressure), suction volume is related to suction pressure. Tolerance 10%.

FB = Flow rate on once-through system

KB = Flow rate combined with partial recirculation at temperature differences of 18 °F, 9 °F, 4 °F warmer than make-up liquid.

Additional liquid carry-over

Pump type	max. liquid carry-over* (continuous operation)
LEM 27, 52, 92, 127	1.5 m³/h / 6.6 US gpm
LEM 162, 252, 327, 427	4.0 m³/h / 17.6 US gpm

* depending from suction pressure

Data regarding pump size – order hints

Range + size		Hydraulic + bearings	Shaft seal	Materials	Casing seal
		A• Threaded connections, standard B• as A•, but with additional connections* C• Flanged connections, standard D• as C•, but with additional connections* •Z two grease lubricated antifriction bearings arranged in the motor	D52, D4W Mechanical seal, elastomers Perbunan D5N, D4J, AFJ Mechanical seal, elastomers Viton	0F Main parts in cast iron, impeller in reinforced plastic - Engineered Polymer - POM 0E Main parts in cast iron, impeller in stainless steel VP Main parts in stainless steel, external screws in stainless steel, impeller in reinforced plastic - Engineered Polymer - POM VA Main parts in stainless steel, external screws in stainless steel, impeller in stainless steel	1 O-rings

* Recommended for the direct mounting of measurement devices for ATEX monitoring

Motor Selection

For our products we offer a lot of different motor types.
To identify the right motor please specify frequency, voltage and protection class.

Order example:

LEMD 52 AZ D52 0F 1 with 2.2 kW AC motor, 50 Hz, 230/400 Volt, IP 55

Any changes in the interest of the technical development are reserved.
